

Complementary immune profiles in inflammatory neuropathies

Blood

Acute GBS and healthy controls

Whole blood and leukocytes
Monocyte pseudobulk
3 cohorts, 31 participants
7 modules and cohort synthesis

Cerebrospinal fluid

GBS, CIDP and healthy controls

Age, sex and CCL19 adjusted
11 paired GBS protein estimates
16 disease comparison estimates
Source tests and pooling uncertainty

Peripheral nerve

CIDP and axonal neuropathy

9 CIDP and 11 CIAP donors
Macrophages and endothelium
Schwann cell programmes
Composition and donor variation
